Hey Dave, any major incidence at LCP due to the storm?

We need to pick up the pace on the trail...

How about we meet and go over the preliminary comments-LCP?-NYC?

Smallest possible group?? Possible dates??

Best

Dave

Jon

Good morning

Going over my notes- you said you would get me contacts, names and numbers, where soil elemental mercury solidification has obviously worked.

While we are actively working on all that we can from our meetings we need to work on that too.

Also anything on the next round of BERA comments?

Please let me hear on these two.

Best

Dave

Hey Dave, just wanted to give you a status of the FS review. I'm pretty much done reading through it, CDM expect to take another 2 - 3 weeks.

You should have comments from us mid-February.

To: Jonathan Gorin/R2/USEPA/US@EPA
Date: 05/10/2012 08:32 AM
Subject: LCP - FS

Jon

I am still waiting for some eco comments on the FS. I will put them in a letter and send them to you as soon as I can. I just wanted to get back to you with the NJDEP's position on remedy selection, which will also be in the letter.

The NJDEP can not concur with the proposed remedy in the cover letter. The NJDEP considers free mercury to be free product and in accordance with 7:26E-5.1(e) of the Technical Requirements for Site Remediation, the person conducting the remediation shall treat or remove free product and residual product to the extent practicable, or

contain free product and residual product when treatment or removal is not practicable. Monitored natural attenuation of free product and residual product is prohibited.

The NJDEP recommends that Site Remedy No. 5b, which includes full Containment and full depth selective excavation and off-site disposal of free mercury, be selected as the remedial action for the LCP Chemicals Site. The NJDEP feels that removal of the free mercury is the most protective remedy. This is consistent with our approach at other sites, where we require removal of free product.

Regards

Anne

Good to talk to you.

Here's a contact for measuring Hg in the neighborhood. I spoke to Tom Corbett the owner and he is fine providing a 110 plug and an area near his workshop on the Dupont site. Tom operates as Grasselli Point Industries on the Dupont site.

Hey Dave, first our trip to Rhode Island was great. We were at Little Compton near Sakonnet Point. I don't think i've ever seen a nicer beach.

How's the FS draft coming along? If you want me to come by and read through some of it informally, i don't mind at all.

Mike Aucott of DEP has been asking about using the trailer again. I don't imagine your new management has changed their mind on that, however would they be ok with Rutgers just coming in with their lumex and taking a few readings?

all for now, jon
